

Smoke Outlook for 8/04 - 8/05

Alaska South Southeast and South Central Alaska

Issued at: 2019-08-04 06:55 AKDT

Fire

Fire activity continues to be minimal in the Swan Lake Fire area, due to precipitation received earlier last week.

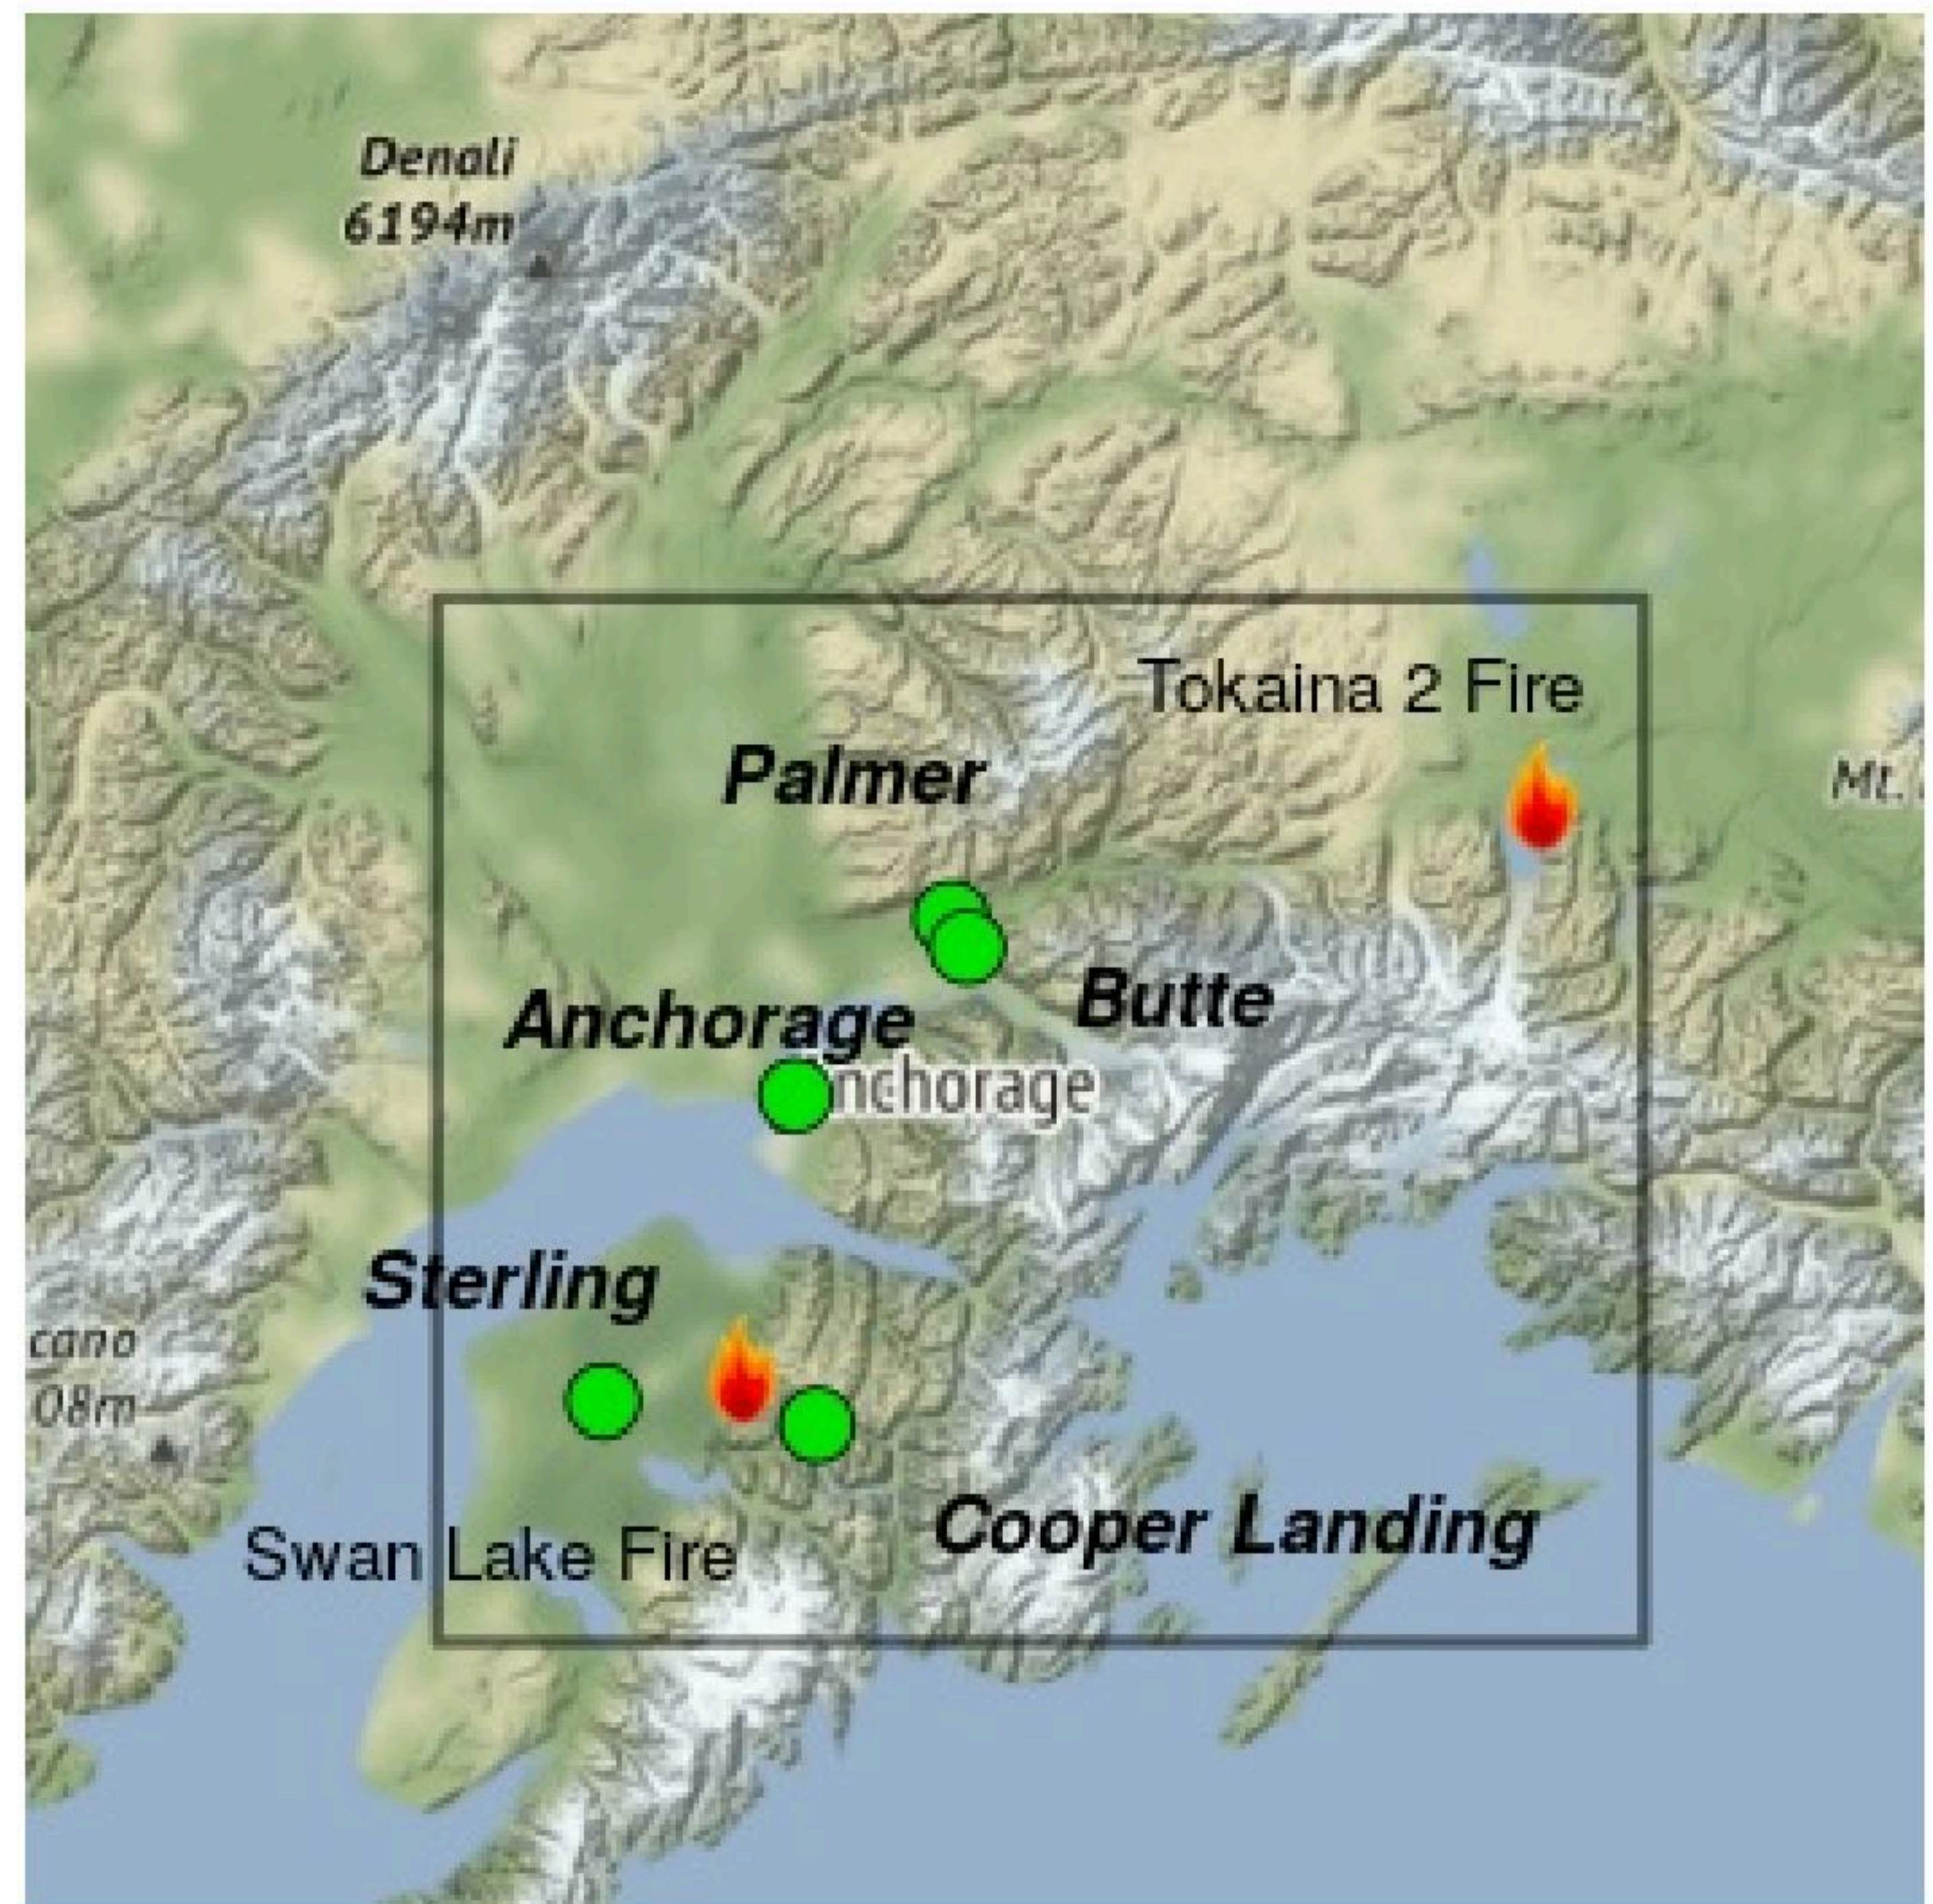

It should be noted that drought conditions are still high in parts of the Kenai Peninsula and the Mat-Su Valley, and with continued warm, dry weather, fire activity could pick up. With the recent dry weather the Tokaina 2 fire has picked up in activity the past several days.

Smoke

There are no expected smoke impacts in the Kenaie Peninsula and Mat-Su Valley areas from the Swan Lake Fire or from fires to the north.

Copper River and Juneau

Overall, air quality should be good across the Southeast. Copper River Basin and Prince William Sound, including Cordova may be impacted by light smoke once again today, as the Tokaina 2 Fire continues to be active.

Daily AQI Forecast* for Aug 04, 2019

Station	Yesterday			Sat 8/03	Comment for Today -- Sun, Aug 04	Forecast*	
	hourly					Sun 8/04	Mon 8/05
